

TEXAS FLOOD STORY

One day in Texas
Rest palms on back

The sun was shining bright
Big circles on back

And then the wind started to blow, with all its might
Move hands across the shoulders and all around the back

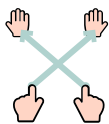

Tiny raindrops came tumbling down
Tapping lightly on the back

And they grew bigger and bigger and filled the ground
Tapping heavily and moving hands across the mid-back

The water rose up SO HIGH!
Move hands across the back upwards the shoulders

Some people were so brave and moved to land that was dry
Walk fingers across back in cross motion and rest on shoulders

It rained and it rained and it rained for days
Drag fingers down back

Everyone - including animals - needed help in so many ways
Press palms all over the back

People came from near and far
Criss cross pattern on back

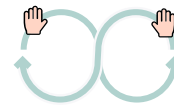

In trucks pulling boats, helicopters and cars
Winding hands all around the back

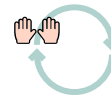

Everyone helped each other out
Walking hands around the back

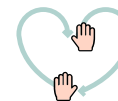

Because we live in Texas and that's what we're all about!
Big HEART shape with whole hand

And finally the wind blew the clouds away
Move hands across the shoulders and all around the back

The sun was shining again in such a special way
Big circles on back

With a new sense of what's important and who we really are
Big HEART shape with whole hand

We belong to each other, so shine like a star!
Tapping lightly all around the back
